Professor Joshua Lederberg  
Genetics Department  
Stanford University School of  
Medicine  
300 Pasteur Drive  
Palo Alto, California

Dear Josh:

I have a student in Genetics 100 who is taking pre-medical training, but has become very interested in genetics; to the point where he might drop the medical course and work toward a Ph.D. in some phase of molecular genetics. He is now exploring the possibility of combining both his interests and has asked me the prospects of such a combination. Since we do not have any contact with the Medical School, you are the only person I could think of who might give him sound advice. He seems to be a very bright boy, who at this stage is in the upper 5% of the class. If you are at all interested, he would be willing to come to Stanford to see you any Monday, Wednesday, or Thursday in the afternoon -- leaving here shortly after 12:00. His name is William Reeves, Department of Epidemiology, Warren Hall, University of California, Berkeley, 94720.

Best wishes to both you and Esther,

Sincerely,

J. A. Jenkins  
Professor of Genetics

JAJ:mh

*Thank you Jim -  
we will contact him right away*

*John.*
